**Examples**

If you're seeing this page, it means you've setup Tomcat successfully.

As you may have noticed, the Tomcat Manager Application is available on the local filesystem at `$CATALINA_HOME/webapps/manager`. It can be found on the local home page. It can be found on the local home page.

where `$CATALINA_HOME` is the directory where you installed Tomcat. If you're seeing this page, and you don't think you've installed it correctly, or you're an administrator who has arrived at new installation of Tomcat, please refer to the [Tomcat Documentation](#) for more information. Providing the latter is the case, please refer to the [Tomcat Documentation](#) for more information and administration information than is found in the [INSTALL](#) file.

**NOTE:** For security reasons, using the administration webapp is restricted to users with role "admin". The manager webapp is restricted to users with role "manager". Users are defined in `$CATALINA_HOME/conf/tomcat-users.xml`.

Included with this release are a host of sample Servlets and JSPs (with associated source code), extensive documentation (including the Servlet 2.4 and JSP 2.0 API JavaDoc), and an introductory guide to developing web applications.

Tomcat mailing lists are available at the Jakarta project web site:

- [tomcat-user@jakarta.apache.org](mailto:tomcat-user@jakarta.apache.org) for general questions related to configuring and using Tomcat
